Parish Council Risk Assessment

The council is expected to carry out an annual assessment of risks it may face. Risk is the threat that an event or action will adversely affect an organisation's ability to achieve its objectives and to successfully execute its strategies. Risk management is the process by which risks are identified, evaluated and controlled. It is the key element of the framework of governance together with community focus; structures and processes, standards of conduct and service delivery arrangements. (Audit Commission- Worth the Risks: Improving Risk Management in Local Government (2002:5))

This document has been produced to enable the Parish Council to assess the risks that it faces and satisfy itself that it has taken adequate steps to minimise them. The Council is aware that although some risks can never be eliminated fully, it has in place a strategy that provides a structured, systematic and focused approach to managing risk.

The list is not exhaustive and Council may wish to consider other risks not identified.

The table below shows general risks that the Parish Council could consider:

Subject - Identifies the subject

Risks Identified - Identifies what the risk may be

Risk Score- Identifies the level of risk

Management/ Risk Control - Evaluates the management and control of the risk and records findings

Review Date / Responsibilities - Reviews, assesses and revises procedures if required

This document was approved by the Parish Council at the meeting held on 9th May 2022

The Chairman
