Dear Community Member,

Butlers Wood Battery Energy Storage System (BESS) Updated proposals and invitation to engage

In March this year, Zenobē held a series of consultation events to introduce proposals for a battery energy storage system (BESS) near Bulmer Tye and gather feedback from the local community.

Since then, we have continued conversations with local stakeholders and carried out further technical work, including drainage and ecology surveys. We have reviewed all feedback received and made updates to the proposals, including exploring the use of an adjacent field.

We would like to invite you to view the updated plans, ask questions, and share your feedback as the project continues to develop.

Join us at our drop-in sessions

Date: Wednesday 17 June

Time: 14:30 – 16:30 and 17:00 – 19:00

Location: Bulmer Village Hall, Church Road, Bulmer, Sudbury CO10 7EH

These are informal drop-in sessions - please come along at any time that suits you. There is no need to book.

About the Butlers Wood BESS

Battery energy storage systems help balance electricity supply and demand, support the integration of renewable energy, and improve grid reliability - key to a stable, low-carbon electricity system. The proposed Butlers Wood BESS comprises the construction and operation of a battery storage scheme, with a total capacity of 500MW.

About Zenobē

Zenobē is a UK-founded clean energy company specialising in battery storage and fleet electrification. We are the leading owner and operator of grid-scale batteries on the GB transmission network, with 1.2GW of battery storage assets in operation or under construction.

Stay informed

If you would like to keep up to date as the project progresses, you can:

- **Scan the first QR code** to visit the project webpage and view the latest information
- **Scan the second QR code** to join our contact list and receive future updates

We'll use these channels to keep the community updated as the project progresses.
