

DOT PROJECT

Children and Young People's Network

16th January 2019

Today

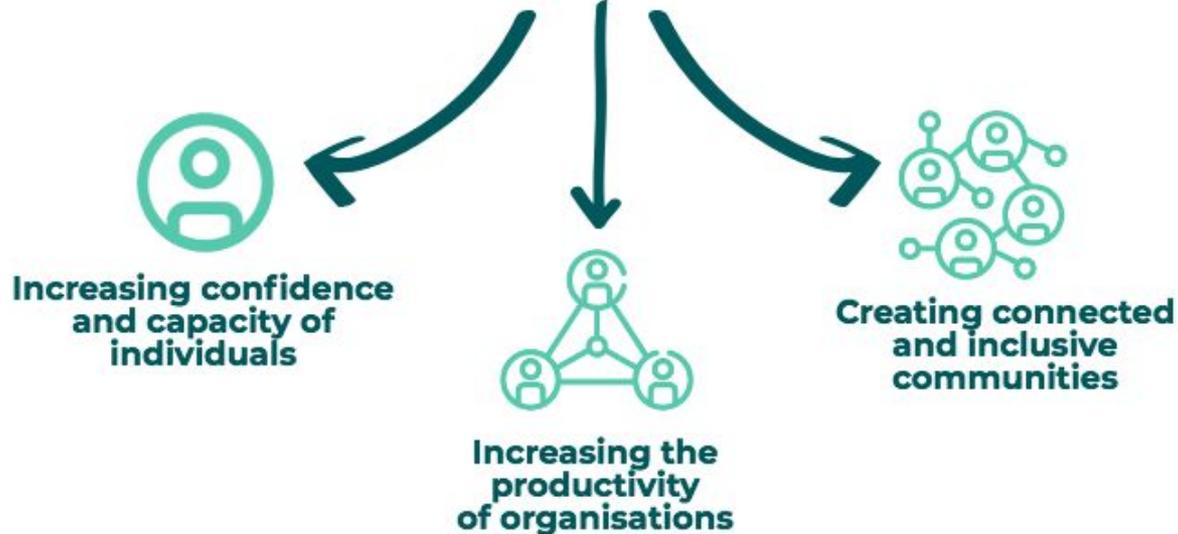

- Who we are
- Thinking responsibly about our approach to technology
- Building strong foundations
- Tech for Good Bath

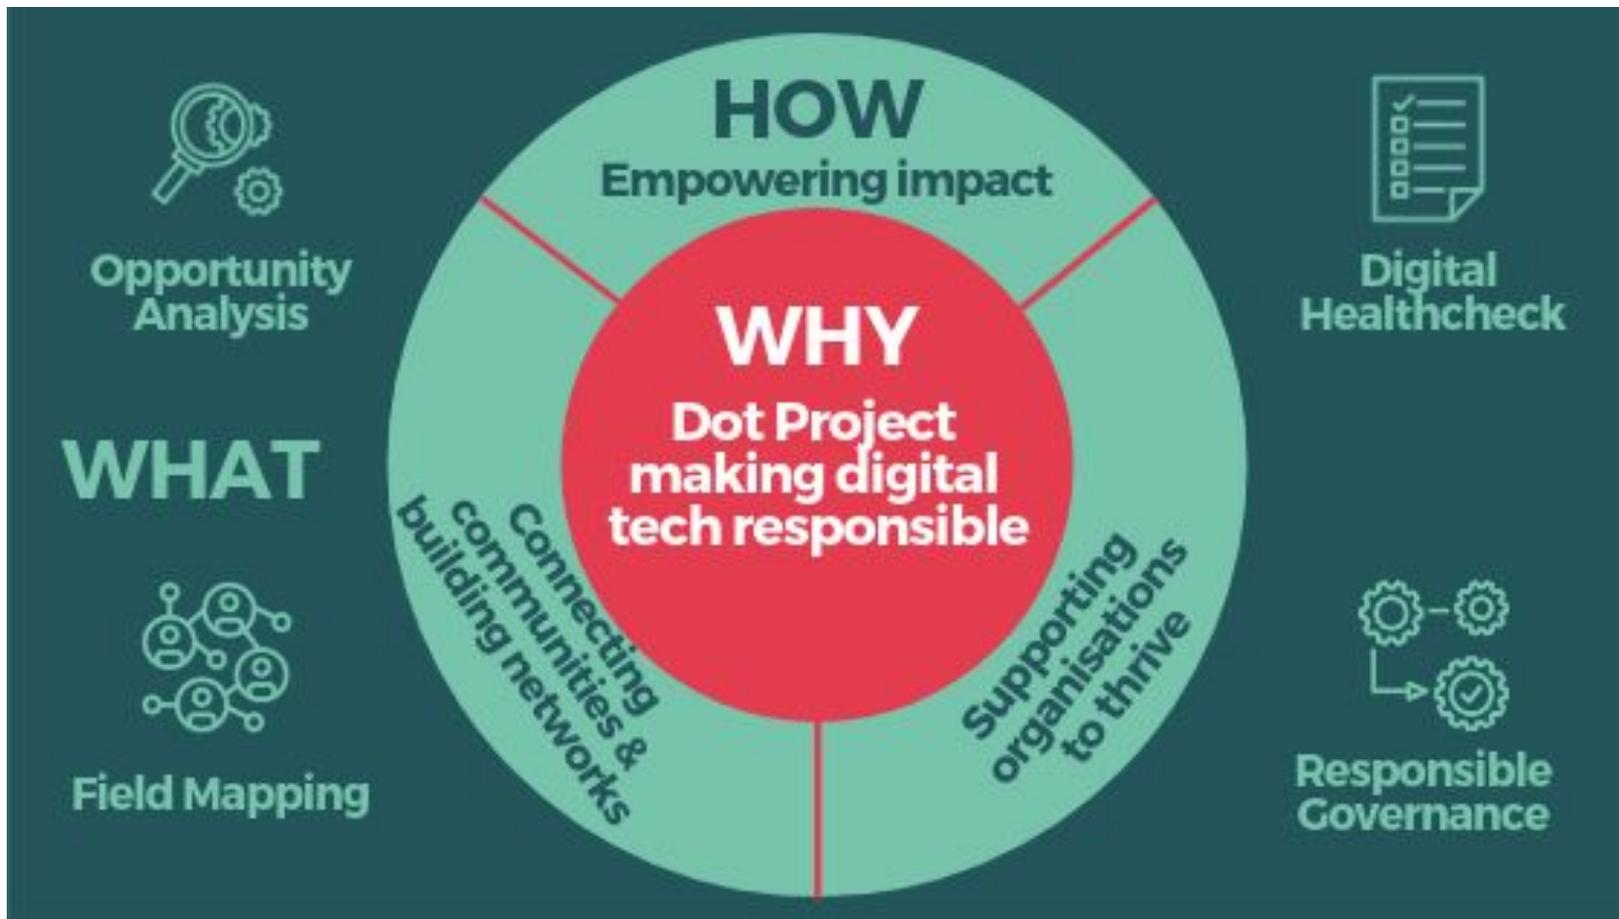

Our purpose

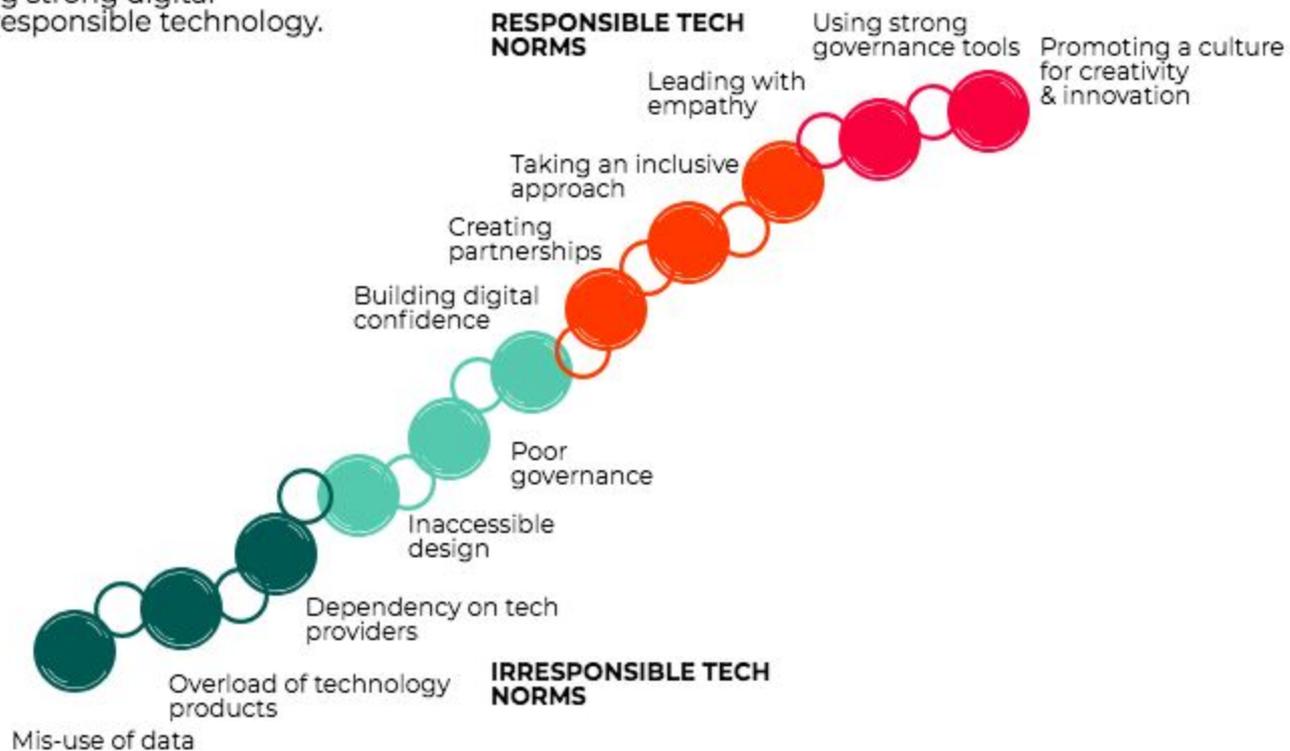

We positively impact humanity by enabling responsible approaches to tech

We achieve this purpose by:

We shift the dial - from irresponsible tech norms to building strong digital foundations for responsible technology.

Responsible Technology

“having good judgment and the ability to act correctly and make decisions”

“having the duty of taking care of something”

The main difference between responsibility and accountability is that responsibility can be shared while accountability cannot. Being accountable not only means being responsible for something but also ultimately being answerable for your actions.

Your digital confidence

1. How would you rate your level of confidence in feeling that you are currently using the appropriate digital applications to meet your needs as an organisation?
2. On a day to day basis how would you rate your level of confidence in using your existing digital applications?
3. How would you rate your level of confidence in knowing what your digital needs might be in the future?

Low level of confidence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	High level of confidence

Discussion

What is your biggest challenge regarding using digital or technology platforms?

Do you currently use digital tools to increase your productivity?

Do you feel that you could be more productive through improving your use of digital tools?

Human-centered design

Tech for Good Bath

Together we can harness the thriving tech sector in Bath to respond to social development across the region.

Our aims

RAISE AWARENESS of how technology is being used for social impact and share good news stories to inspire and educate

ENCOURAGE new connections between technical and non-technical people and make technology accessible and understandable

PROVIDE introductions and promote access to key technical, business and creative skills that support our goals

BUILD conversations with like minded organisations in Bath and the South-West

Since Tech for Good Bath began in early 2017 our work has included:

- Free events with guest speakers
- Free skills workshops
- Information sharing online
- Networking opportunities
- Speaking at events about Tech for Good
- Informal mentoring

450 members - open to all
