

As you may know, the 2018 Stansted Airport Planning Application for expansion to 43 million passengers per annum has not yet been given final approval. There are difficulties with the proposed Section 106 Agreement and there have been a number of new material considerations and changes in circumstances in the seven months that have passed since the Planning Application was given provisional approval in November last year. As a consequence, SSE is pressing Uttlesford District Council to refer the Planning Application back to the (new) Planning Committee for further consideration.
