Meadow Plan

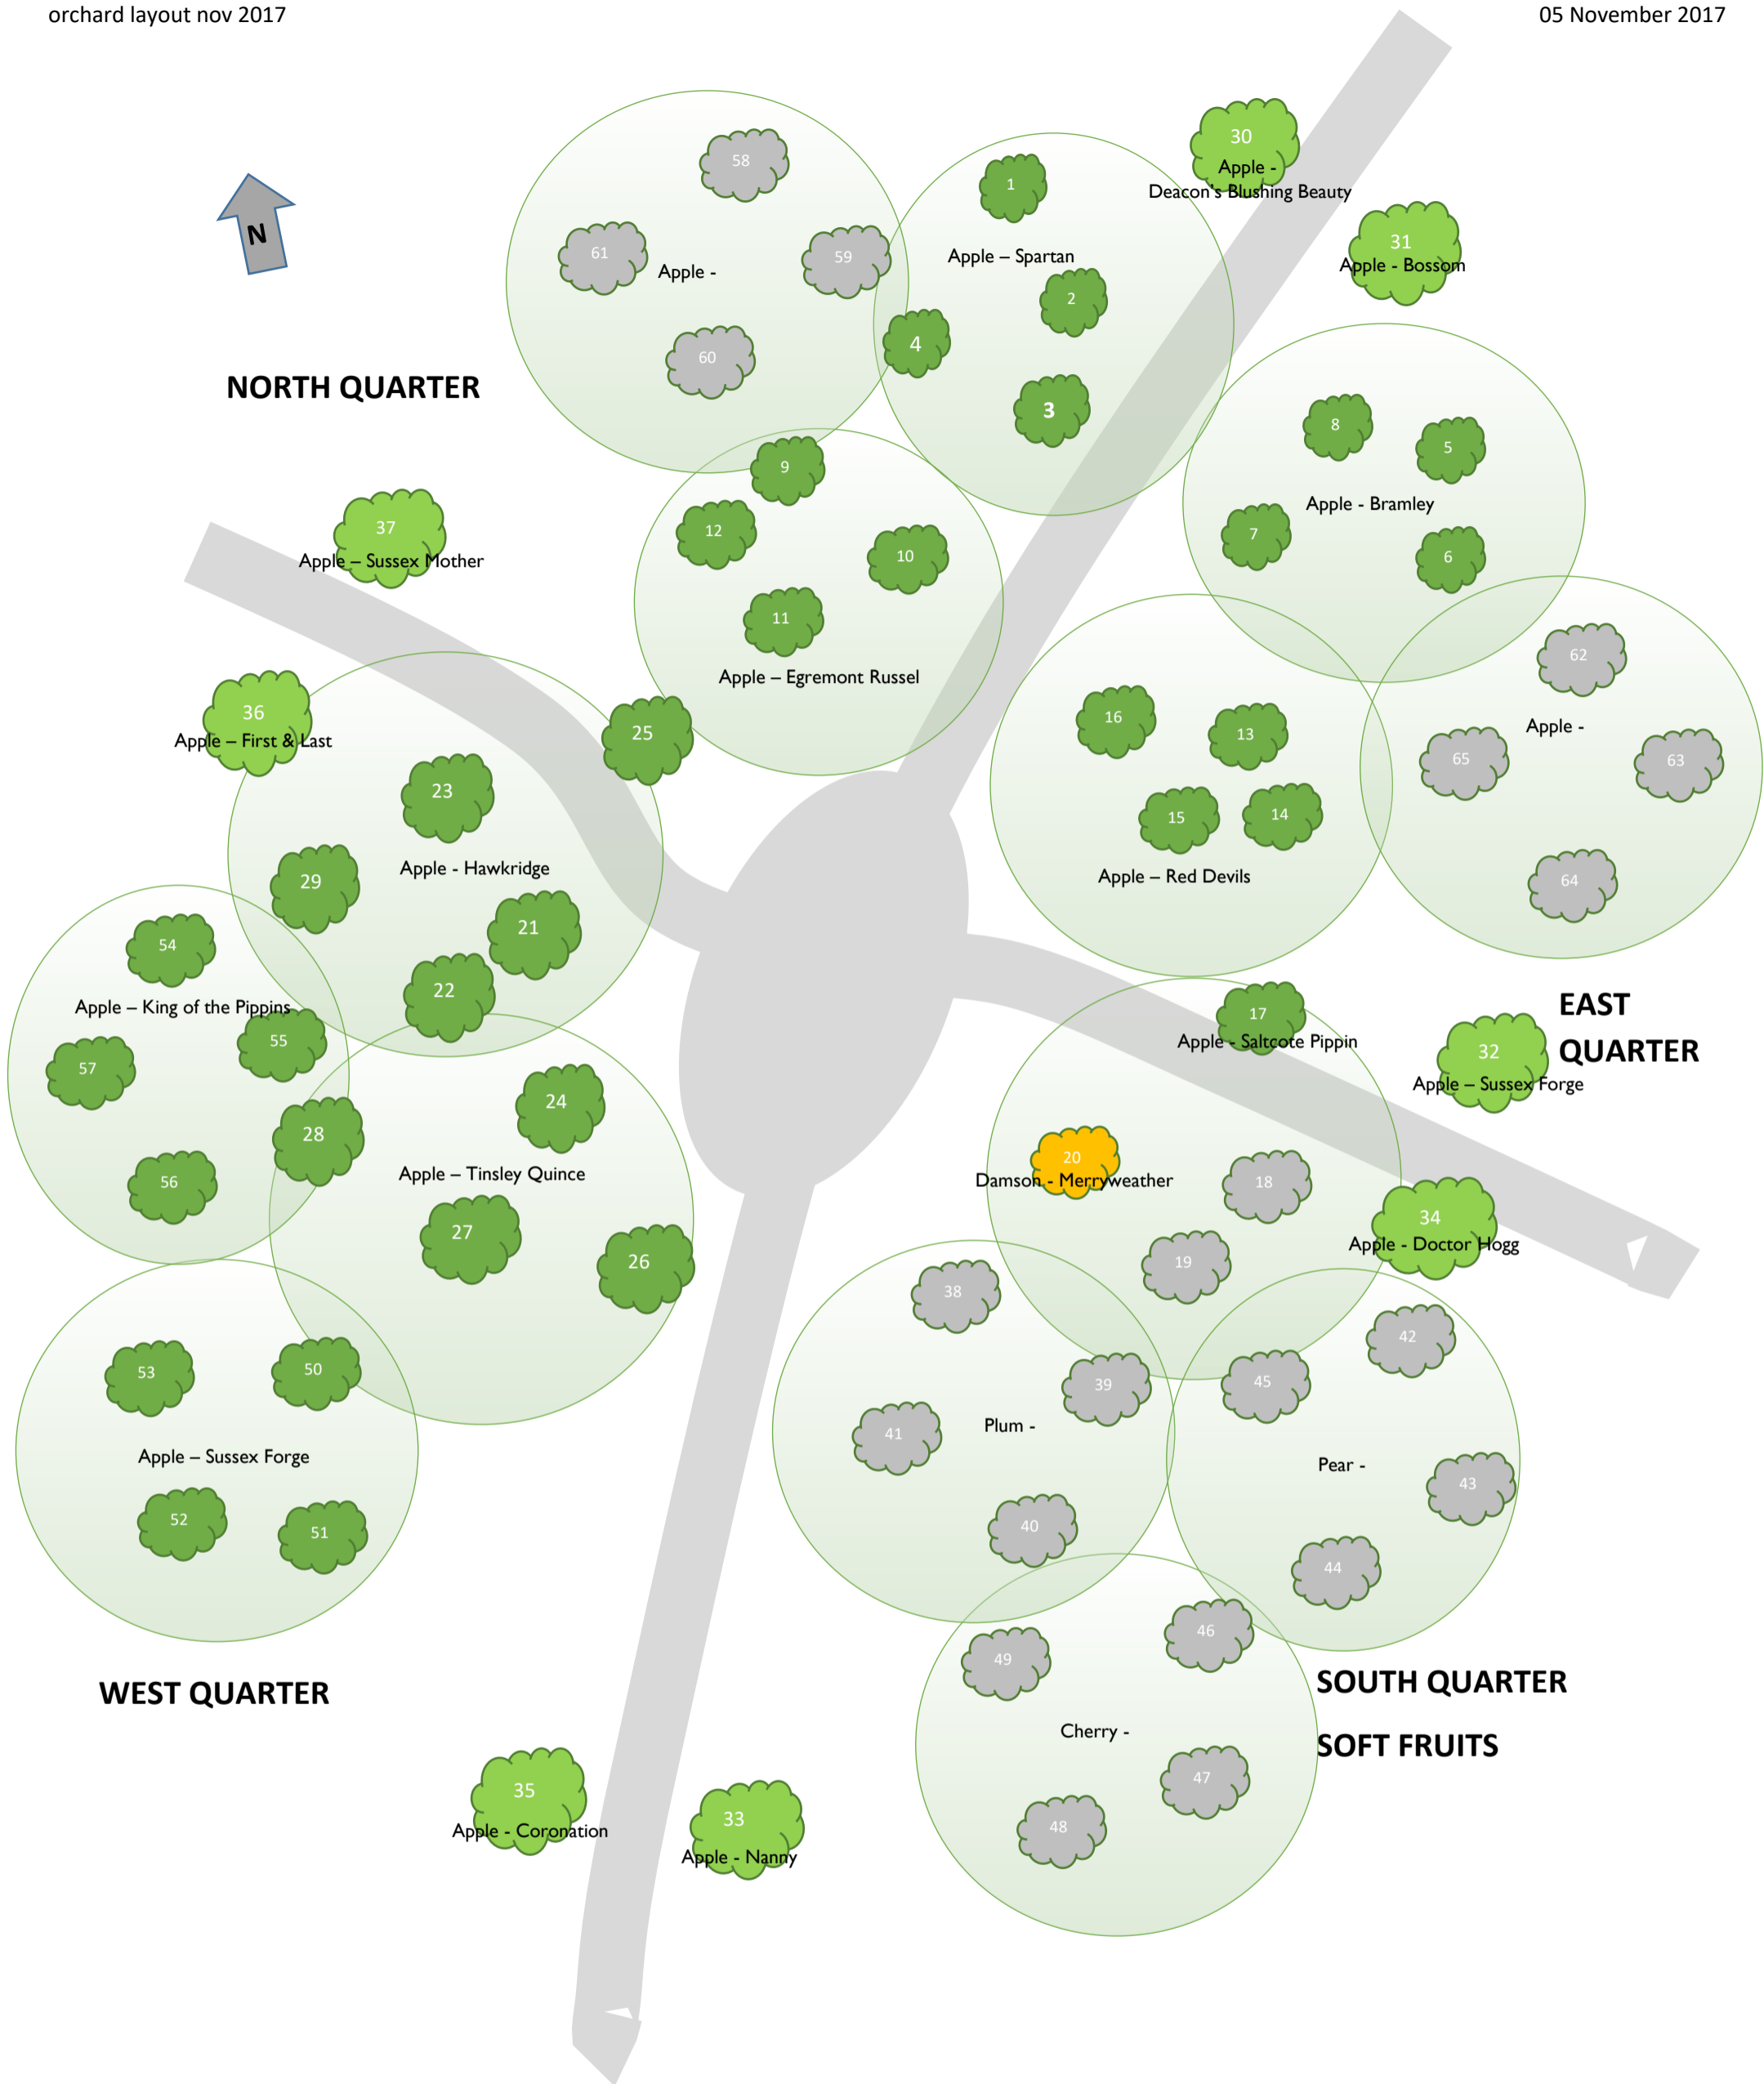

Location of the Community Orchard

- Planting Notes.
- Expert advice will be sort as to the exact positioning of trees and spacing.
 - Tree spacing will be at least 5m. The plan is to scale and show trees at maturity (~3m²).
 - Positioning of tree will be random and natural but will make allowance for efficient mowing.

NORTH QUARTER

The layout of the orchard is intentionally natural and random. The trees have been planted in four areas and grouped by rootstock and variety. The orchard is divide by two informal paths which run up and across the orchard and meet in the central open area. Each path enters the orchard between two gateway trees which will be the tallest in the orchard (6m).
