Dear Mrs Boydell,

**CONSULTATION BY EE LTD AND HUTCHISON 3G LTD
PROPOSED SHARED MOBILE TELECOMMUNICATIONS RADIO EQUIPMENT AT PELHAM HALL
FARM (FIELD), CHURCH ROAD, TWINSTEAD SUDBURY, SUFFOLK, C010 7NB [NGR E: 585176
N: 236623] – REPLACING SITE 36398 “DOVE HOUSE FARM”**

Mobile operators EE and 3 (H3G) currently have a radio base station located at Dove House Farm, Great Henny, Sudbury, CO10 7NQ which provides network coverage to your area. This site is serving as a temporary replacement until a permanent site is found. The loss of an established site from the network can result in a loss of communications and data services locally and wider disruption to the network if a replacement site capable of adequately replicating coverage within that specific area is not identified and integrated into the network at the earliest opportunity.

The operators are now seeking to secure a replacement site in your local area to prevent any loss of services once the apparatus at Dove House Farm has been removed. Following a search of the area and consideration of various potential options, a suitable solution has been identified that can adequately replace the coverage being lost.

The purpose of this letter is to inform you of the proposed installation and provide you with an opportunity to comment or seek additional information prior to the submission of an application to the local authority.

Proposed location: Pelham Hall Farm (Field), Church Road, Twinstead Sudbury, Suffolk, C010 7NB [NGR E: 585176 N: 236623]

Proposed development: Installation of a 20m high slimline lattice supporting 6no antenna apertures & 4no 600mm dishes; installation of 9no cabinets; ancillary development thereto. Please refer to drawings numbered Rev A 002-265.

This site and design have been selected as they allow the technical requirements to be met safely, whilst keeping environmental and visual impact to a minimum. The structure has been kept to 20m in height which is the minimum needed to achieve technical requirements, and cabinets have been sited to avoid disruptions to pedestrians and road users.

We confirm that the installation has been designed to be fully compliant with the public health and safety guidelines established by the ICNIRP, the independent commission set up to provide scientific advice

and guidance on the health and environmental effects of non-ionizing radiation to protect people and the environment. These guidelines have the support of UK Government and the formal backing of the World Health Organisation. They are in place to protect all members of the public, wherever they are in relation to a base station, 24 hours a day.

We respectfully request that any comments are submitted in writing within 14 days and include site reference 97537.

Yours faithfully,

Ciara Daly
Town Planner
Waldon Telecom
For and on behalf of MBNL (EE UK Ltd and H3G UK Ltd).
