The Hennys', Middleton & Twinstead Parish Council  
C/o. Mrs Boydell – Parish Clerk

**VIA TRACKED E-MAIL**

Dear Mrs Boydell

**CONSULTATION BY EE LTD AND HUTCHISON 3G LTD  
PROPOSED SHARED MOBILE TELECOMMUNICATIONS RADIO EQUIPMENT AT GREENFIELD  
BEHIND RYES LANE, SUDBURY, SUFFOLK, CO10 7DZ (NGR: 585423, 238659) – REPLACING  
SITE 96398 “LAND AT DOVE HOUSE FARM”**

Mobile operators EE and 3 (H3G) currently have a radio base station located at 96398 Land at Dove House Farm, Amos Hill, Great Henry, Sudbury, CO10 7NQ, which provides network coverage to your area. This site is being lost from the network for reasons beyond the operators control. The loss of an established site from the network can result in a loss of communications and data services locally and wider disruption to the network if a replacement site capable of adequately replicating coverage within that specific area is not identified and integrated into the network at the earliest opportunity.

The operators are now seeking to secure a replacement site in your local area to prevent any loss of services once the apparatus at Dove House Farm has been removed. Following a search of the area and consideration of various potential options, a suitable solution has been identified that can adequately replace the coverage being lost.

The purpose of this letter is to inform you of the proposed installation and provide you with an opportunity to comment or seek additional information prior to the submission of an application to the local authority.

Proposed location: Greenfield land behind Ryes Lane, Sudbury, Suffolk, CO10 7DZ (NGR: 585423, 238659)

Proposed development: Installation of a 25m high slimline lattice tower supporting antennas and dishes, with equipment housing at ground level, all contained within a fenced compound.

The size and amount of apparatus proposed has been kept to the minimum with which the specific technical requirement can be adequately met.

We confirm that the installation has been designed to be fully compliant with the public health and safety guidelines established by the ICNIRP, the independent commission set up to provide scientific advice and guidance on the health and environmental effects of non-ionizing radiation to protect people and the environment. These guidelines have the support of UK Government and the formal backing of the World Health Organisation. They are in place to protect all members of the public, wherever they are in relation to a base station, 24 hours a day.

We respectfully request that any comments are submitted in writing within 14 days and include site reference 77502.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'M. Flaherty', with a long horizontal flourish extending to the right.
