Subject: Communal Aerials Middlesex Street

[2016-12-00 CoL Newsletter.pdf](#)

Finally Property Services has answered.

Please explain who, where and why this decision was changed?

I understood the upgrade to the Communal (television) aerial is of minimal cost?

Your query below has been passed to the Property Services team and their response on this matter is;

Depending on which 'communal aerials' you are referring to, if it is the TV communal aerial then there are no plans to upgrade this.

There are a couple of initiatives being looked at by the City:

- Install aerials to provide a wireless concessions to improve wireless coverage across the City – Steven Bage - Strategic Infrastructure Advisor, City Surveyor

- Install Fibre cable either to the block or to the home for television and broadband services – Steven Bage - Strategic Infrastructure Advisor, City Surveyor

I hope this answers your question.
