Some Tips for Exhibitors in the Floral Sections

Read the Show Schedule carefully before deciding your entries. The Judge will read the description of each class before judging it. If your entry does not meet the description it will be declared NAS - not according to schedule – and will not be included in the judging.

Judging Flowers and Ornamental Plants

In assessing the merits of most exhibits of flowers and some exhibits of pot plants consideration will be given to condition and uniformity.

Staging flowers and ornamental plants is particularly important. Although no points are awarded for arrangement, attractive presentations catch the eye of the judge. In the case of cut flowers in metal vases (supplied by the PGS) experienced exhibitors use newspaper or 'Oasis' in the vase to stabilise the individual stems.

The RHS Horticultural Show Handbook classifies Dahlias into 13 Groups (**Groups 1-10 are illustrated on the next page**).

Class 36 calls for 3 blooms from the Decorative Group.

Class 37 calls for 3 blooms from the Cactus Group

Class 38 calls for 3 blooms from the remaining 11 Groups.

Class 40 calls for a collection of mixed flowers in one bowl, with a maximum diameter of 8 inches. A bowl is a vessel where the mouth width measurement is at least equal to, but usually greater than its height. A vase has a greater height than the width measurement of its mouth.

Classes 41 – 49 give the exhibitor a wide range of possibilities, but ensure that your flower pot or container is clean and within the maximum size limits.

Conclusion

We do not wish to put you off showing – in fact it can be great fun. We welcome new exhibitors and if you want some advice please approach any committee member or the show stewards on the day. We look forward to seeing you at the Show.

DAHLIAS

The variety of border hybrids offers a dazzling display of colour and form to every gardener, and no special skills are required to cultivate or propagate them. In colour the flowers range from deep reds, crimsons, purples, hues of mauve, and vibrant pinks to whites, apricots, oranges, bronzes, and brilliant scarlets, in size from the tiny pompons of 52mm (2in) to huge exhibition blooms greater than 254mm (10in) across.

Dahlias are excellent for providing cut flowers and will bloom vigorously throughout summer until the first frosts – provided with the right conditions a single plant may produce up to 100 blooms. Their various flower types (shown below) form the basis of the recognized groups.

Single – each flower usually has 8–10 broad petals surrounding an open, central disc.

Anemone – fully double flowers each have one or more rings of flattened ray petals surrounding a dense group of shorter, tubular petals, usually longer than disc petals found in single dahlias.

Collerette – single flowers each have broad, outer petals, usually 8–10, and an inner 'collar' of smaller petals surrounding an open, central disc.

Water-lily – fully double flowers have large, generally sparse ray petals, which are flat or with slightly incurved or recurved margins, giving the flower a flat appearance.

Decorative – fully double flowers have broad, flat petals that incurve slightly at their margins and usually reflex to the stem.

Ball – flattened to spherical, fully double flowers have densely packed, almost tubular petals.

Pompon – flattened to spherical, fully double flowers are no more than 52mm (2in) across – a miniature form of ball flowers.

Cactus – fully double flowers have narrow, pointed petals that can be straight or curl inwards and have recurved edges for more than two-thirds of their length.

Semi-cactus – fully double flowers are similar to cactus flowers but have broader-based petals, the edges of which are generally recurved towards their tips.

Miscellaneous – flowers are in a wide range of unclassified types, including orchid-like (shown right), single and double forms.
