

Yummy, yummy good for my tummy

Make a food chain using the pictures and the arrows.
Think about what gets energy from what.

Next, take away one of the pictures from your food chain. Talk about what will happen to the rest?

If there is time, act out your food chain.

Answers

Take away the sun – ultimately everything dies, but first the wheat wouldn't grow so there would be no food for the mice, which would die out, and then no food for the owls.

Take away the wheat - there would be no food for the mice, which would die out, and then no food for the owls, and too much wheat would grow.

Take away the mouse - there would be no food for the owls which would die out, and too much wheat would grow.

Take away the owl – There would be nothing to keep the mouse population down and so they would eat all the wheat, which eventually would mean there wasn't enough wheat to feed them and they would die out too.
