Clive Norris

### WCA Trustee's Standing down in 2018

Donald Roy served as a WCA Trustee from January 2008 to March 2018 and Clive Norris served from March 2011 to December 2018. They have both been valuable members of the Board and contributed in the progress of Wandsworth Care Alliance, their input will be greatly missed. The continued growth and success of Wandsworth Care Alliance is dependent upon having hard-working and devoted Trustees like Donald and Clive. We sincerely appreciate the hard work, effort and commitment both have given us over the years, and we wish them both the best for their continued success.

Thank you for your hard work and dedication!

# **Healthwatch Wandsworth** 2017-18

We launched the #itstartswithyou campaign

locally, to make sure people know about us and what we can do to help improve health &

social care services for local people.

We held a mental health event about Issues for local people and local services, with a focus on LGBTQ+ issues & suicide prevention, this year Healthwatch **England promoted our** SUICIDE findings on LGBTQ+ mental

PREVENTION awareness

We have been encouraging the involvement of service users in the newly designed sexual health services, particularly young people.

We have been to 73 community events and have spoken to over 1028 patients, service users and carers in 2017-18.

health support needs.

We asked people about eve health wellbeing issues to help inform London-wide research

We reached over 900 people in 2017-18 on a variety of social media platforms and try to keep the public up-to-

into what might need to be improved.

We have been promoting the need for patient involvement at St. George's Hospital, and

have taken part in patient-led inspections and have represented the patient perspective at high level quality monitoring meetings.

We visited 3 senior health wards at St George's Hospital in 2017 to hear about dementia care. The

hospital has since told us about changes they made as a result of our work.

We help people find information about local health and social care services or signpost

them to the relevant local services that can help them further, as well as helping them to understand how to pursue a complaint or concern they may have with a service.

Our 35 volunteers have contributed over 2400 hours of their time in 2017-18 The volunteers are vitally important to our work. They bring energy,

expertise, experience and local knowledge to everything that we do.

# Healthwatch Wandsworth 2017-18

### Reaching people in the community

One of the ways we connect with the local community is by going out to meet people at community groups and events. We discuss their local health and social care experiences and

needs with them and then use what people tell us to build a picture of how health and social care is working for local people. We relay this information to health and social care providers and decision makers to effect change where it might be needed.

#### Healthcare in Wandsworth prison

We also spoke to people about the mental health needs of ex-offenders. The information collected provided us with a unique perspective of the mental health challenges faced by prisoners, both while in prison and later when they are released.

Our Enter and View team is now investigating health and care

provided in Wandsworth prison.

# Working in partnership and building relationships

This year, we developed relationships with the following organisations, to strengthen our work with other information-providing organisations:

- > The Wandsworth Clinical Commissioning Group Wellbeing Hub
- > POhWER, the Independent Health Complaints Advocacy Service
- Wandsworth Adult Social Services .

The aim was to improve knowledge of each others' organisational processes and the overall effectiveness of information and signposting between organisations, and to avoid people feeling like they are being passed from "pillar to post". We also shared information about the issues people were raising, to improve our understanding of local issues.

# Wandsworth LGBT Mental Health Project 2017-18

The Wandsworth LGBT Mental Health Project is part of Wandsworth Care Alliance. Our aim is to

improve the experiences of local LGBT people who may use mental health services either in Primary Care or Secondary Care. We are working with the NHS Mental Health Providers and other organisations including the Wandsworth LGBT Forum to reduce health inequalities.

In October, Project Manager John Morrill was invited by the LGBTQ+ Staff Network at TFL to give talks to staff at two of their

main office buildings in London. These were well received and was a great opportunity to raise the profile of mental health issues within the LGBTQ+ community. Being "out" in the workplace is not easy which in itself has an effect on an individual's mental health.

We now have social media Support, David Robson from the Wandsworth LGBTO+ Forum manages the Wandsworth LGBT Mental Health's facebook page, uploading information concerning the LGBTO+ community.

https://www.facebook.com/Wandsworth.LGBT.Mental.Health/

This year the Mental Health Trust introduced

rainbow coloured lanyards for staff, this is not to identify LGBT staff but is a very effective aid to signal that the member of staff is LGBT friendly.

LGBT people sometimes discover that providers do not have the knowledge or

experience in caring for them. These

barriers present a challenge for LGBT individuals. There have been discussions with GP Practices and Care providers on how they can be more LGBT

inclusive, and these discussions are continuing.

Over the course of the year, the Project has been increasingly contacted by staff at the Mental Health Trust on how best to support

a service user in their care who is part of the LGBTQ community. This is positive and shows

that the profile of the Project within the Mental Health Trust is very visible and is seen as a valuable asset for advice, support and signposting.

More than 10 million adults identify with the LGBT community, this number is continually on the rise as more people feel comfortable "coming out."

LGBT people continue to face significant barriers to full participation in public life. Just remember your sexual orientation or

your gender identity should not be a barrier to success.

## **Voicing Views Project** 2017-18

The Project, during the course of the year, has been heavily involved in the re-shaping of the Rehabilitation Service. We have been working with Adult Social

Services and Commissioners on the Service Specification and the Tender and Selection of the new Provider, Hestia. There has been a lot of Service User involvement

throughout and we've been working with Hestia to ensure a smooth transition. John Morrill, the Project Manager continues to attend the Steering Group to ensure the views of Service Users are heard.

John Morrill has a seat on the Duel Diagnosis Steering Group.

Duel Diagnosis is where a service user has mental issues and issues relating to substance misuse. He is

in the process of establishing a Duel Diagnosis Service User Group which will feed directly in to the Steering Group. This will ensure that the views and concerns of service users will have a direct feed in to Commissioners and Service Providers. It is hoped this will be up and running at the start of December 2018.

### Primary Care **Plus**<sup>©</sup>

Voicing Views has been actively involved on the **Primary Care Plus Steering** 

Group. The Primary Care Plus Pilot has mental health professionals based in GP Surgeries in the Wandle area and provides support to service users who have been discharged from Secondary Care. The pilot has been deemed a success and will now be rolled across the Borough. Voicing Views will continue to be part of the Steering Group that oversees the service.

The service user monthly group meetings have been consistently well attended.

When asked what they liked about the meetings and what they didn't like, the responses were very positive, they liked the

location and format and being able to get advice, to express their views and to discuss changes to services.

**Voluntary Sector Project** 2017-18

In the Spring Lauren Ashley-Boyall returned from maternity leave and Julie

**Bristow who** had been

operating the project for the past year agreed to continue with us at WCA, with the pair now job-sharing the role.

Since the inception of the project we have pushed for stronger voluntary sector presence and representation at all tiers throughout our statutory

organisations. We were delighted that this Autumn the Health and Wellbeing Board agreed to a voluntary Together, sector seat on the board.

This Summer we conducted our first ever Stakeholder Feedback Survey, where members of our voluntary & community sector network

as well as colleagues from Wandsworth Clinical Commissioning Group and

Wandsworth Council told us which of our activities had the most impact and why. We received lots of positive and encouraging feedback.

We have continued to host a quarterly Voluntary Sector Forum, to date we have had speakers from Wandsworth Public Health, the **Community Partnerships Team** from the council Wandsworth CCG, Primary Care Plus, information on the Local Fund and Wandsworth Grants programme as well as 28 presentations from voluntary sector organisations. In addition we have continued to publish a regular newsletter sharing both local and national voluntary sector news,

events, training and funding opportunities.

We have welcomed Gerard Davis to our team

as Volunteer Social Media Officer, launched our twitter & facebook accounts and begun to

develop our online presence and network through these channels.

We have continued to grow and diversify our network as well as consolidated our mailing list which now comprises around 300 different voluntary and community organisations and lauren@wandcareall.org.uk groups. JOIN OUR mailing list Julie@wandcareall.org.uk

# Learning Difficulties Project 2017-18

The project is continuing to create opportunities to engage with people with learning disabilities - as well as professionals and providers - about the issues

that affect them. These have included monthly meetings, focus groups, easy read surveys and visits. We took part in over 70 meetings and events and volunteer representatives with learning disability were empowered

to contribute their views about the services they use.

Learning Disability Clinical Reference Group and Health Actions group meetings are carrying on and we have recruited 4 new volunteer representatives to take part. In the last year there have been considerable changes in the structure and the staffing of the Local

Authority and CCG in Wandsworth. Those changes have led to the recent appointment of dedicated commissioning managers for Learning Disability. We are looking forward to the review of the Learning Disability strategy and to new opportunities for co-production and service users' involvement.

We have been given a regular seat on the South West London Mortality Review Steering Group (LeDeR) meetings. LeDeR is the first national programme of its kind aimed at making improvements to the lives of people with learning disabilities. The programme is led by the University of Bristol on behalf of NHS England.

Reviews of deaths of people with Learning Disability are being carried out in Wandsworth with a view to improve the standard and quality of care. As part of the process, reviewers contact families, carers and people with a learning disability. The latest LeDer report shows that the median age of death was 58. In the general population it is 82 for men and 85 for women. The 3 main causes of

death among people with learning disability are: pneumonia, aspiration pneumonia and epilepsy. LeDeR report: <a href="http://www.bristol.ac.uk/sps/leder/">http://www.bristol.ac.uk/sps/leder/</a>

Thanks to Alex our volunteer consultant, a preliminary study was undertaken about the feasibility of a quality checking service in Wandsworth undertaken by people with learning disability. We have looked at different models and tools that have been used by organizations and neighbouring boroughs, as well as funding requirements.

#### **Wandsworth Care Alliance**

#### Was established in 1991 and became a registered charity in 2005

The aim of our work is to empower and support the people we work with particularly marginalised groups, to have an effective voice and role in the community.

We support their capacity for creativity, enterprise, contribution and personal enrichment.

Through our activities we aim to release community capacity, nurture partnerships and facilitate practical and sustainable change.

Our work centres on a belief that effective change comes when a community is able to recognise, value and build upon their own assets. We operate & manage a number of service user and community led organisations, including Wandsworth Healthwatch.

Our beneficiaries include Mental Health Service Users, Learning Disability groups, Voluntary Sector Organisations and Local Communities
